

ECO TAN®

Sonya Driver became consumed with finding a safe sunless tanning alternative after her sister was diagnosed with a melanoma at only 30 years of age.

“I began researching the ingredients in products we were using and I did not like what I found... I wasn’t prepared to use these products on my own skin and was even more concerned about the risk they posed to my sister.” It was in these very moments that Eco Tan was pioneered.

Using a Certified Organic skin care range really does make a difference. After all, your skin is your largest organ and much of what you put on it gets absorbed into the bloodstream. Whether you prefer your self tan to be express or slow-building, Eco Tan promises you the most beautiful, believable bronze for all complexions, with NO hidden nasties. Guaranteed!”

CERTIFIED ORGANIC

Eco Tan was Australia's first tanning range to become Certified Organic by the Organic Food Chain Australia. Our entire product range is made with only natural and organic ingredients.

CERTIFIED TOXIC FREE

We are proudly Certified Toxic Free by Safe Cosmetics Australia through only using natural and organic ingredients.

CRUELTY FREE

We are proud to be an Animal Cruelty Free Company, promising that our products are not, and will never be, tested on animals. Certified with Choose Cruelty Free Australia & PETA.

VEGAN TAN & BODY PRODUCTS

We guarantee that every one of our tan and body products is FREE from animal derivatives.

VEGETARIAN SUN CARE PRODUCTS

We proudly use only natural ingredients in our sun protection products.

AUSTRALIAN MADE

We are a proudly Australian Made & Owned Company.

- ✓ Blood Orange

Overview:

The entire Eco Tan tanning range is made solely from all things organic and natural. It contains no nasty chemicals, no alcohols, no synthetics, no fragrances and NO food colouring. Eco Tan tanning products will react with the amino acids in your dead skin cells to produce a natural, long lasting colour that will be perfect for your own skin tone.

Pre-tanning instructions:

We recommend exfoliating 24-48 hours PRIOR to your first application with the Extreme Exfoliating Glove and the Eco by Sonya Pink Himalayan Salt Scrub. This ensures that you remove all old excess skin cells but also allows your body enough time to build up new, fresh skin cells so that when the product is applied there is plenty for the product to hold on to and work with.

Note: If you exfoliate too close to putting tan on, you will have removed all dead skin cells resulting in the product having nothing to work with. This will mean your tan will not last and is likely to be very light or inexistant.

You do not need to exfoliate between applications.

Application instructions:

Apply product onto clean, dry skin using your hand or a cotton bud for the Face Tan Water (you do not need an application mit / glove because the product will not stain your skin). Take care to cover all areas. However, use sparingly on areas such as elbows, wrists, knees and ankles. A light application on these areas with no excess product on your hands is recommended. Avoid applying tan to your heels. Wash hands thoroughly once finished application with warm, soapy water. Allow 6-8 hours for the product to develop before showering.

The tan will keep developing and deepen further for 24 hours.

WINTER SKIN™

Gradual daily moisturizer that builds to a beautiful honey tan. 2 in 1 it's your TAN + MOISTURISER
